

360° Cryo SFMS PRO+

1 MACHINE WITH DOUBLE EFFECT

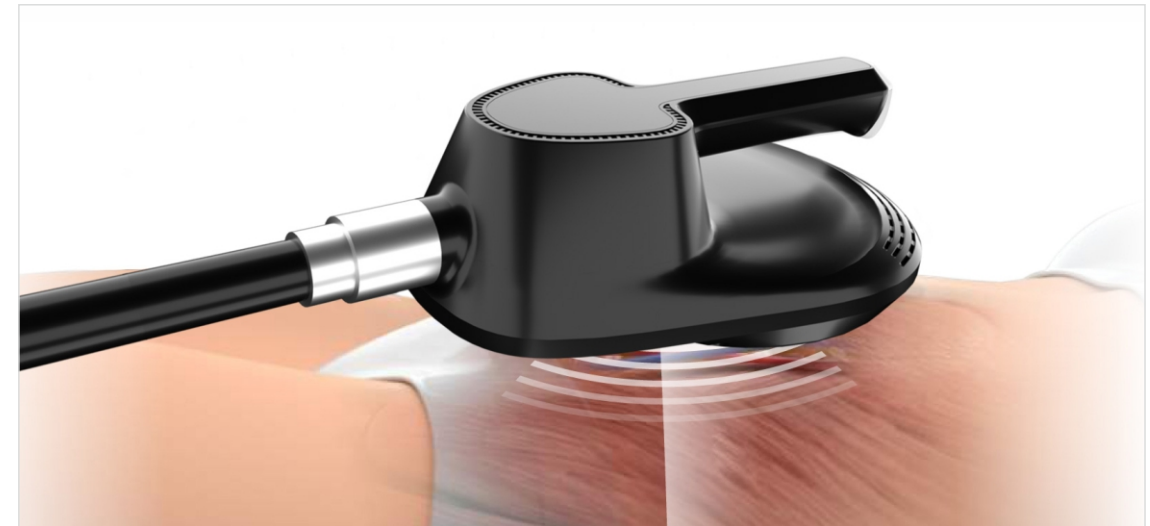

The new combination for muscle increase and fat reduction.
Build muscle and reduce fat in 45mins,
4 areas could treat at same time, faster and more effective.

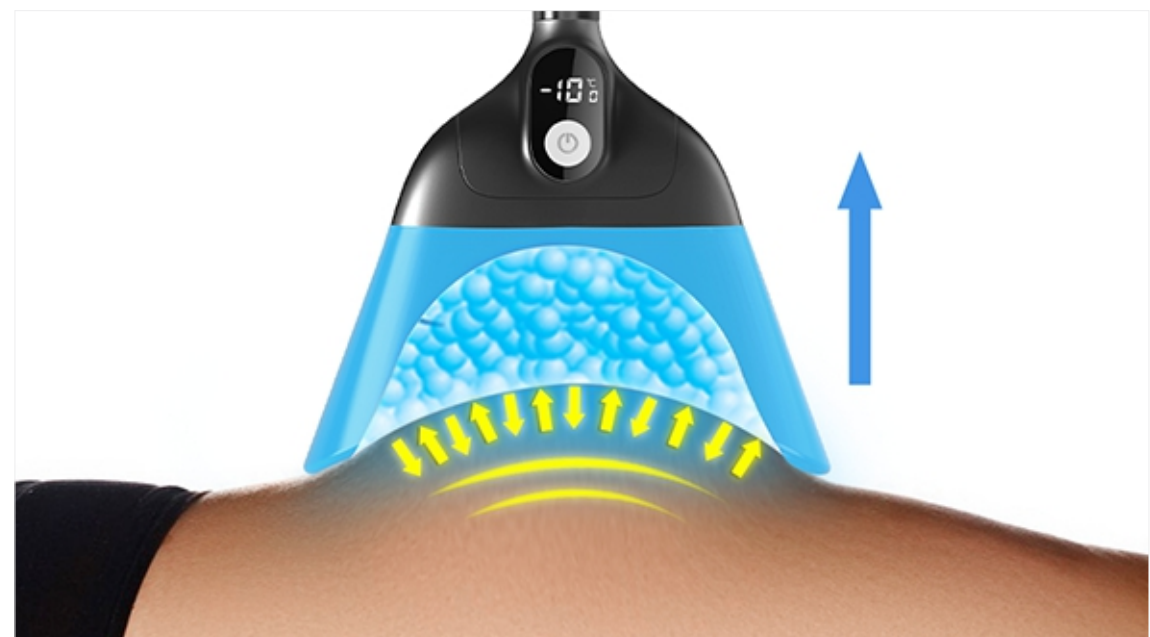

360°Cryo SFMS
— PRO+ —

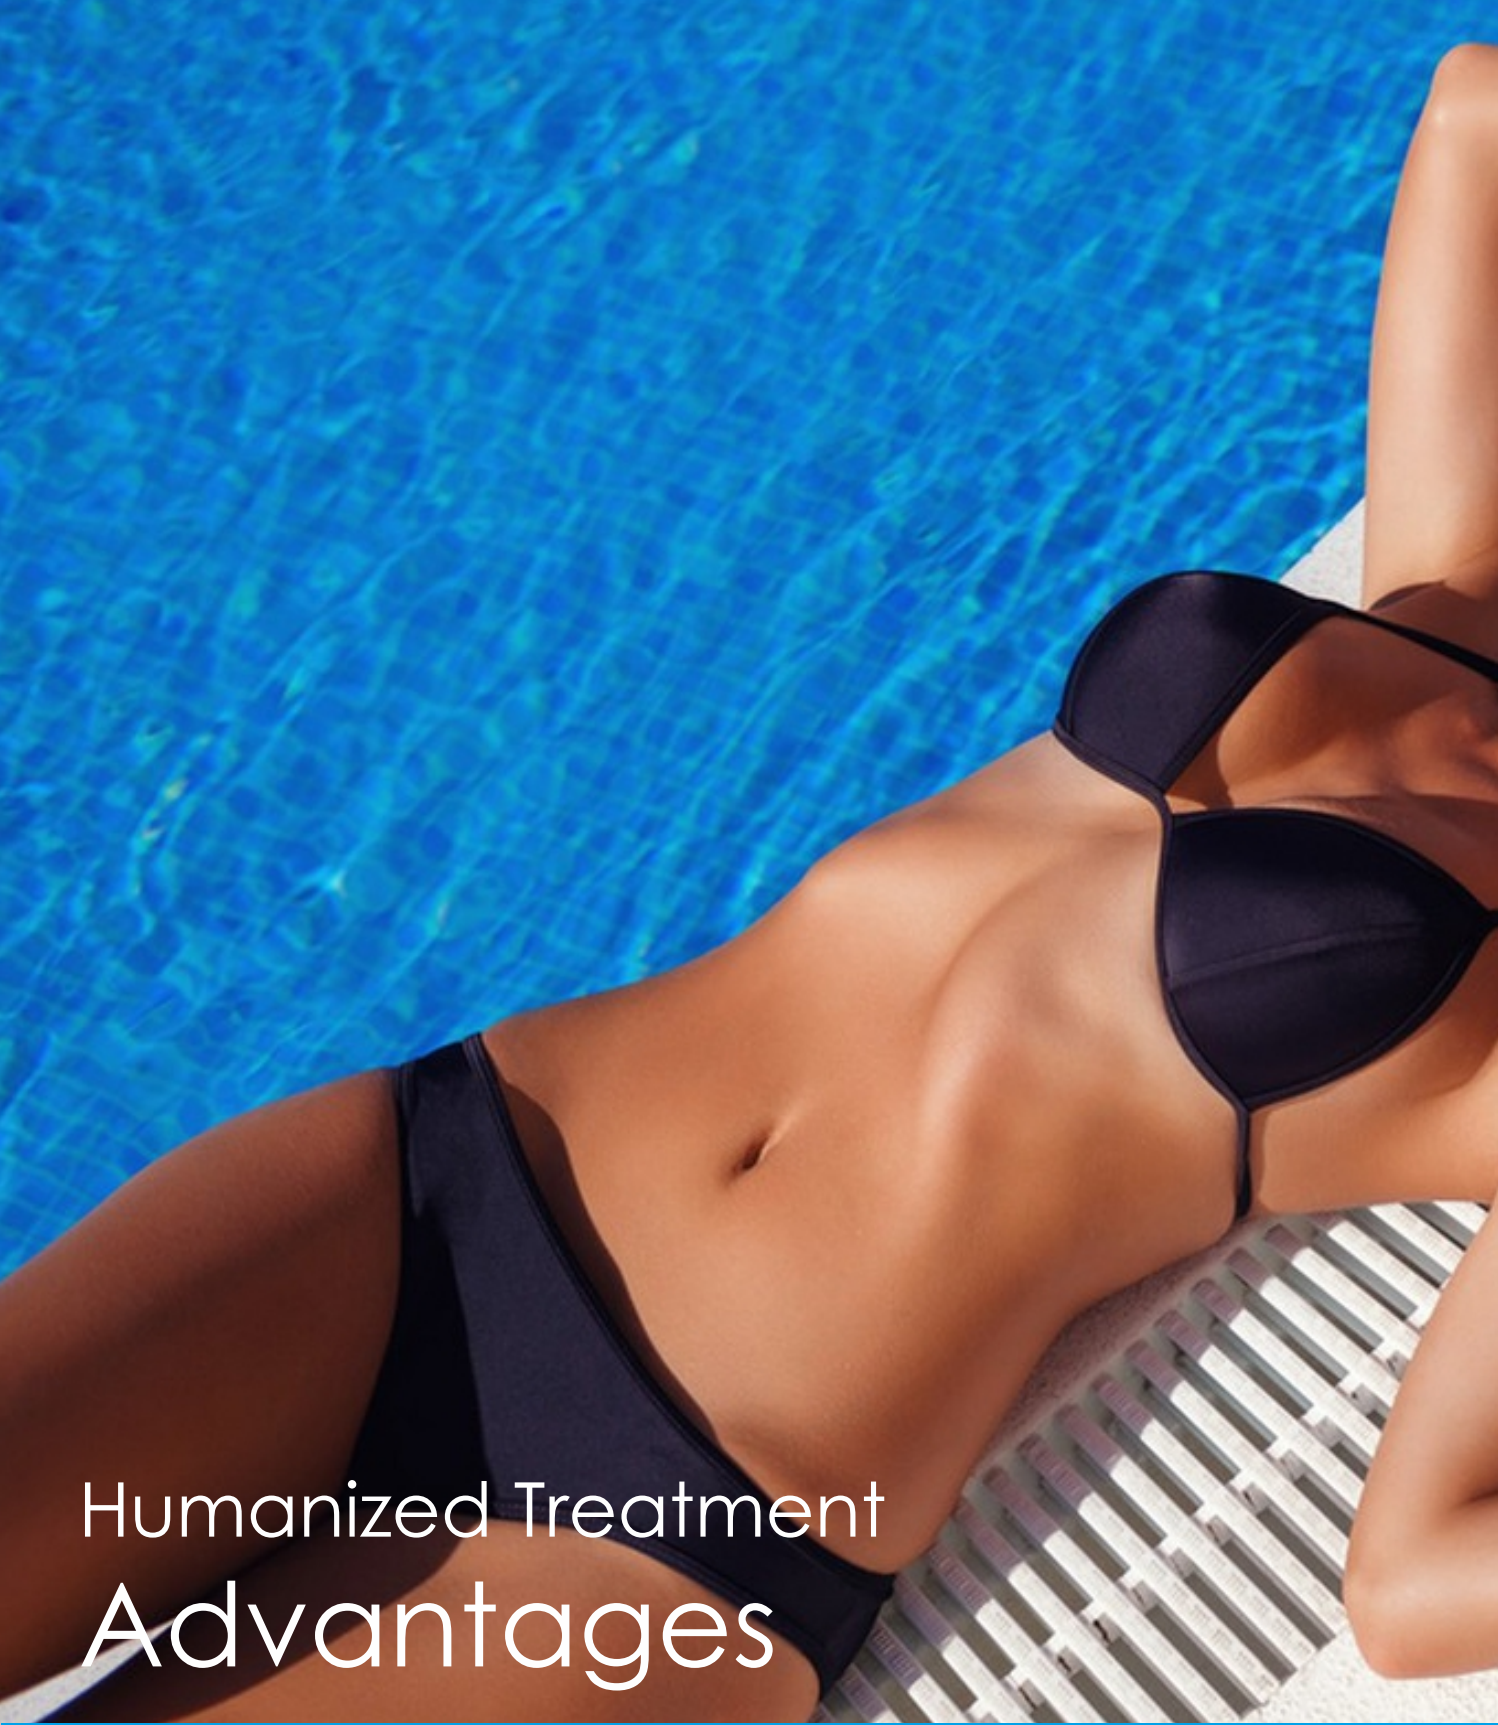

COMBINING TWO TECHNOLOGIES

The combination of 360° Cryo and high-focused electromagnetic technology can freeze fat cells at low temperature and reduce the thickness of the fat layer. At the same time, the high-energy electromagnetic energy acts on the core muscle group for a second time, stimulates the growth of muscle fibers, consumes excess fat, and achieves sustainable muscular body shaping.

HOW DOES 360°CRYO WORK ?

The 360° Cryo machine uses state-of-the-art freezing technology removes excess subcutaneous fat from a specific location. The state of the art 360° Cryo fat freezing technology removes excess fat from a specific part of the body by dissolving fat cells using cool temperature without damaging the surrounding tissue. Once cold, fat cells will decompose naturally and gently be eliminated through the body's normal metabolic processes. Designed with 360° Surround Cooling Technology, the multiple cooling cups fit all curves and contours from as high as your chin all the way down to the knees to deliver absolute, non-invasive body contouring your way.

					
You may struggle with stubborn fat even after jogging and dieting.	The 360° Cryo machine suctions your skin and subcutaneous layers.	Cooling energy then freezes fat deposits to induce apoptosis.	Crystallized fat cells die off through the body's natural metabolism.	Remaining fat in the target area to become leaner and less dense.	Combine with your healthy regimen to look slimmer and confident.

Fast and Easy Applicator Exchange

With a simple press-and-release mechanism, the 360° Cryo machine allows maximum convenience and makes switching cooling cups as simple as possible. Detaching cables or turning the system off is not required even during treatments.

HOW DOES 360°CRYO WORK ?

/Non-invasive Fat Dissolving
/Muscle Building
/Private Anti-Age

Super focused electromagnetic stimulate muscles to perform high-intensity and high-frequency contractions, start myofibril repair to achieve the effect of muscle growth, increase body muscle tissue and increase basal metabolism; high-energy focused electromagnetic fields are used for high-frequency and high intensity muscle training.

Multi-Function, New Technology

SMFS (SUPER FOCUSED MAGNETIC STIMULATION)

- Flat applicator

- Curve applicator

- It's for arms, abdomen, pelvic floor and buttock.

- * High working frequency up to **150HZ**, more than 20,000 "ultra - muscle exercises", achieving extraordinary performance
- * **Plug-in type**, working head design is more convenient and stable.
